

# ONTAP Data Protection Administration (DATAPROT9)

ID DATAPROT9 Preis 1.800,- € (exkl. MwSt.) Dauer 2 Tage

## Zielgruppe

NetApp customers, partners, and employees

## Voraussetzungen

- [ONTAP Cluster Administration \(ONTAP9ADM\)](#)
- ONTAP Data Protection Fundamentals (web-based)

## Kursziele

This course focuses on enabling you to do the following:

- Describe the data protection features in NetApp ONTAP software
- Explain the components and configuration of SyncMirror software
- Describe data mirroring relationships in ONTAP software
- Configure SnapMirror relationships for data replication
- Demonstrate storage virtual machine disaster recovery (SVM DR)
- Explain the components and configuration of MetroCluster software
- Configure SnapVault software for disk-to-disk backup and recovery
- Describe NDMP operation to back up data to tape
- Explain cloud-based data protection with NetApp Cloud Volumes ONTAP and NetApp Data Availability Services
- Describe the NetApp and third-party software that is used for ONTAP data protection management

This course describes some of the key concepts and techniques for protecting data in NetApp ONTAP systems. You learn about the different data protection solutions that are integrated into ONTAP software, including the SyncMirror, SnapMirror, storage virtual machine (SVM) disaster recovery, and SnapVault solutions. The course also provides an overview of ONTAP MetroCluster configuration, NDMP, and cloud-based data protection with NetApp Cloud Volumes ONTAP and NetApp Data Availability Services. You also learn about the tools for managing ONTAP data protection features. In the hands-on exercises, you use NetApp OnCommand System Manager and the CLI to complete key data protection tasks.
