

# Oracle Sales Cloud: Import and Export (D99439)

ID D99439 Preis 1.708,- € (exkl. MwSt.) Dauer 2 Tage

## Kursüberblick

In this hands-on course, you'll learn about the Oracle Sales Cloud bulk data management tools to import and export data.

### Learn To:

- Import data using Quick Import macros.
- Import data through Simplified Import.
- Import data through Classic (File-Based) Import.
- Import custom objects.
- Monitor and verify the imported data.
- Export data.

### Benefits to You

By taking this course, you will walk away with the knowledge of how to import large amounts of data into Oracle Sales Cloud and export data from the application. It is common that you need to import large amounts of data into the application when initially implementing and routinely when updating sales data. This course teaches you how to do it. Please note: this course is appropriate for Oracle Cloud deployments.

### Zielgruppe

- Technical Consultant
- Technical Administrator
- IT Director

### Voraussetzungen

#### Required Prerequisites:

- [Introduction to Oracle Sales Cloud \(D96396\)](#)

#### Suggested Prerequisites:

- [Oracle Sales Cloud Implementation](#)

[\(D99435\)](#)

## Kursziele

- Identify the mechanisms to import and export large quantities of data
- Import and export data
- Use mappings

## Kursinhalt

### Importing Data

- Quick Import macros
- Simplified Import
- Classic (File-Based) Import
- Source System References and unique record identifiers
- Source files and import jobs
- Attachments

### Mappings

- Oracle supplied templates
- Runtime mappings
- Reusable mappings
- Auto mapping

### Import custom objects

- Security
- Enabling custom objects for import

### Exporting data

- Bulk export
- File-Based export

### Web services

### Recommended Practices

- Considerations
- Sequencing
- Common data issues
