

VMware Horizon 7: Design Workshop (VHDW)

ID VHDW Preis 2.150,- € (exkl. MwSt.) Dauer 3 Tage

Zielgruppe

Experienced system administrators and system integrators responsible for designing and implementing VMware Horizon solutions

Voraussetzungen

This course recommends the following skills and knowledge:

- Virtualized desktop implementation experience
- Understanding of concepts presented in the VMware Horizon 7: Install, Configure, Manage course or equivalent experience
- Understanding of concepts presented in the VMware Data Center Virtualization Fundamentals course

Kursziele

This three-day course presents a methodology for designing a VMware Horizon® solution. The design methodology includes recommendations for the type of information and data that must be gathered and analyzed to make sound design decisions for client systems, desktop options, VMware vSphere® infrastructure, and VMware Horizon components. VMware best practices are presented for each phase of the design process. In this course, you apply your new knowledge by working with other participants to design a VMware Horizon solution for a real-world project.

By the end of the course, you should be able to meet the following objectives:

- Assess the business and application requirements of an environment
- Analyze design choices and design an

infrastructure architecture for end-user computing that addresses the needs of the environment

- Design a VMware Horizon infrastructure architecture that addresses the needs of the organization and follows VMware best practices
- Document a design that can be implemented
- Design a comprehensive VMware Horizon solution

Kursinhalt

- Course Introduction
- Infrastructure Assessment
- VMware Horizon Design
- VMware Horizon Block and Pod Design
- Pool and Desktop Configuration
- VMware Infrastructure Design
- Storage Design
- Network and Security Design
- End-User Session Design
- Delivering and Managing Applications

Detaillierter Kursinhalt

1 Course Introduction

- Introductions and course logistics
- Course objectives

2 Infrastructure Assessment

- Define customer business objectives
- Gather and analyze business and application requirements
- Use a systematic methodology to evaluate and document design decisions

3 VMware Horizon Design

- Identify the design process to build a VMware Horizon solution

- Identify the VMware Horizon reference architecture
- Outline the process to define a use case
- Determine use cases for a given business case study
- Outline the process to define service definition

4 VMware Horizon Block and Pod Design

- Identify the components of a typical VMware Horizon block and pod
- Outline the relationships between VMware Horizon management block components
- Design a VMware Horizon desktop block and pod configuration for a given use case
- Configure cloud pod architecture for multisite pool access

5 Pool and Desktop Configuration

- List the key considerations for sizing hardware for a desktop virtual machine
- Identify key virtual desktop performance tuning and Windows optimizations and their effects on VMware Horizon performance
- Map use cases to VMware Horizon instances and VMware Horizon pools
- Design desktop pools for a given use case

6 VMware Infrastructure Design

- Identify factors and design decisions that determine the sizing for VMware ESXi™ hosts
- Estimate and size CPU and memory requirements
- Determine cluster requirements for VMware vSphere® High Availability and VMware vSphere® Distributed Resource Scheduler™
- Outline the privileges that are required by an administrative user account

7 Storage Design

- Identify factors that determine the sizing for shared storage
- Determine storage-sizing formulas for clone disks
- Reduce storage requirements with instant clones
- Identify use cases and benefits of using View Storage Accelerator

- Identify use cases and benefits of using VMware vSAN™

8 Network and Security Design

- Identify the design decisions related to bandwidth use
- Identify use cases and benefits of using load balancing and traffic management
- Identify the best practices for avoiding network congestion
- Recognize the PCoIP and Blast Extreme optimization strategies
- Describe the design considerations for sizing network capacity
- Evaluate security features of the security server and VMware Unified Access Gateway™
- Compare the security server and Unified Access Gateway

9 End-User Session Design

- Configure Horizon Persona Management for end-user personalization
- Discuss the use of VMware User Environment Manager™ for personalizing desktops
- Identify VMware best practices for Active Directory containers, groups, and Group Policy object policies in a VMware Horizon solution
- Identify VMware best practices for True SSO
- Identify client device characteristics and requirements

10 Delivering and Managing Applications

- Describe the importance of the application delivery mechanism
- Determine which VMware Horizon application tool should be used to accomplish which business objectives
- Design and create Remote Desktop Services farms and application pools to support the deployment of applications

Über Fast Lane

Die weltweite Fast Lane-Gruppe ist Spezialist für Technologie- und Business-Training und Beratung im Highend-Bereich. Fast Lane ist autorisierter Trainingspartner führender Hersteller und bietet zudem eigene IT-Trainingsprogramme zu aktuellen Technologien und den wesentlichen Trends an. Herstellerübergreifende Beratungsleistungen reichen von vorbereitenden Analysen und Evaluierungen über die Konzipierung zukunftsweisender IT-Lösungen bis zum Projektmanagement und zur Umsetzung der Konzepte im Unternehmen. Training-on-the-Job und Weiterqualifizierung der zuständigen Spezialisten bei den Kunden verbinden die Kernbereiche der Fast Lane Dienstleistungen Training und Consulting.

Fast Lane Services

- ✓ Highend-Technologietraining
- ✓ Business- & Softskill-Training
- ✓ Consulting Services
- ✓ Managed Training Services
- ✓ Digitale Lernlösungen
- ✓ Content-Entwicklung
- ✓ Remote Labs
- ✓ Talentprogramme
- ✓ Eventmanagement-Services

Trainingsmethoden

- ✓ Klassenraumtraining
- ✓ Instructor-Led Online Training
- ✓ FLEX Classroom – Klassenraum und ILO kombiniert
- ✓ Onsite & Customized Training
- ✓ E-Learning
- ✓ Blended & Hybrid Learning
- ✓ Mobiles Lernen

Technologien und Lösungen

- ✓ Digitale Transformation
- ✓ Artificial Intelligence (AI)
- ✓ Cloud
- ✓ Networking
- ✓ Cyber Security
- ✓ Wireless & Mobility
- ✓ Modern Workplace
- ✓ Data Center

Weltweit vertreten
mit High-End-Trainingszentren in
60 Ländern rund um den Globus

Mehrfach ausgezeichnet
von Herstellern wie AWS, Microsoft,
Cisco, Google, NetApp, VMware

Praxiserfahrene Experten
mit insgesamt mehr als
19.000 Zertifizierungen
