Implementing Network Security (IANS)

Kursüberblick

This course covers intermediate security concepts and prepares you for the ACP - Network Security (ACP-NS) certification exam. This training will help administrators use the HPE Aruba Networking portfolio to implement a Zero Trust Security (ZTS) protection model for their networks. Attending the course will teach you how to:

- Configure HPE Aruba Networking infrastructure with ClearPass solutions to authenticate/control both wired & wireless users, as well as remote users through Security Service Edge (SSE).
- Collect contextual information with ClearPass Policy Manager (CPPM) & implement advanced role mapping as well as enforcement policies.
- Use ClearPass Device Insight to enhance visibility.
- Set up features such as the AOS-CX Network Analytics Engine (NAE), HPE Aruba Networking Wireless IDS/IPS (WIDS/WIPS), & gateway IDS/IPS.
- Investigate alerts.

Zielgruppe

Typical candidates for this course are network engineers responsible for implementing security controls on enterprise networks. Learners can describe the network security stack (firewall, proxy, remote access, IDS/IPS, access control, NTA, UEBA).
