

Performing CyberOps Using Cisco Security Technologies (CBRCOR)

ID CBRCOR Preis 3.950,- € (exkl. MwSt.) Dauer 5 Tage

Kursüberblick

The Performing CyberOps Using Cisco Security Technologies (CBRCOR) v1.0 course guides you through cybersecurity operations fundamentals, methods, and automation. The knowledge you gain in this course will prepare you for the role of Information Security Analyst on a Security Operations Center (SOC) team. You will learn foundational concepts and their application in real-world scenarios, and how to leverage playbooks in formulating an Incident Response (IR). The course teaches you how to use automation for security using cloud platforms and a SecDevOps methodology. You will learn the techniques for detecting cyberattacks, analyzing threats, and making appropriate recommendations to improve cybersecurity.

This course also earns you 40 Continuing Education (CE) credits towards recertification and prepares you for the 350-201 CBRCOR core exam.

What to expect in the exam

350-201 Performing CyberOps Using Cisco Security Technologies (CBRCOR) is a 120-minute exam associated with the Cisco CyberOps Professional Certification. The multiple-choice format tests knowledge of core cybersecurity operations including cybersecurity fundamentals, techniques, policies, processes, and automation. The exam will test for knowledge in the following areas:

- Monitoring for cyberattacks
- Analyzing high volume of data using automation tools and platforms—both open source and commercial
- Accurately identifying the nature of attack and formulate a mitigation plan
- Scenario-based questions; for example, using a screenshot of output from a tool, you may be asked to interpret portions of output and establish conclusions

Zielgruppe

Although there are no mandatory prerequisites, the course is particularly suited for the following audiences:

- Cybersecurity engineer
- Cybersecurity investigator
- Incident manager
- Incident responder
- Network engineer
- SOC analysts currently functioning at entry level with a minimum of 1 year of experience

Empfohlenes Training für die Zertifizierung zum

Cisco Certified Cybersecurity Professional (CCCP)

Voraussetzungen

Although there are no mandatory prerequisites, to fully benefit from this course, you should have the following knowledge:

- Familiarity with UNIX/Linux shells (bash, csh) and shell commands
- Familiarity with the Splunk search and navigation functions
- Basic understanding of scripting using one or more of Python, JavaScript, PHP or similar.

Recommended Cisco offering that may help you prepare for this course:

- [Implementing and Administering Cisco Solutions \(CCNA\) v2.1](#)
- [Understanding Cisco Cybersecurity Operations Fundamentals \(CBROPS\)](#)

Kursziele

After taking this course, you should be able to:

- Describe the types of service coverage within a SOC and

- operational responsibilities associated with each.
- Compare security operations considerations of cloud platforms.
- Describe the general methodologies of SOC platforms development, management, and automation.
- Explain asset segmentation, segregation, network segmentation, micro-segmentation, and approaches to each, as part of asset controls and protections.
- Describe Zero Trust and associated approaches, as part of asset controls and protections.
- Perform incident investigations using Security Information and Event Management (SIEM) and/or security orchestration and automation (SOAR) in the SOC.
- Use different types of core security technology platforms for security monitoring, investigation, and response.
- Describe the DevOps and SecDevOps processes.
- Explain the common data formats, for example, JavaScript Object Notation (JSON), HTML, XML, Comma-Separated Values (CSV).
- Describe API authentication mechanisms.
- Analyze the approach and strategies of threat detection, during monitoring, investigation, and response.
- Determine known Indicators of Compromise (IOCs) and Indicators of Attack (IOAs).
- Interpret the sequence of events during an attack based on analysis of traffic patterns.
- Describe the different security tools and their limitations for network analysis (for example, packet capture tools, traffic analysis tools, network log analysis tools).
- Analyze anomalous user and entity behavior (UEBA).
- Perform proactive threat hunting following best practices.
- Investigating Endpoint and Appliance Logs
- Understanding Cloud Service Model Security Responsibilities
- Understanding Enterprise Environment Assets
- Implementing Threat Tuning
- Threat Research and Threat Intelligence Practices
- Understanding APIs
- Understanding SOC Development and Deployment Models
- Performing Security Analytics and Reports in a SOC
- Malware Forensics Basics
- Threat Hunting Basics
- Performing Incident Investigation and Response

How you'll benefit

This course will help you:

- Gain an advanced understanding of the tasks involved for senior-level roles in a security operations center
- Configure common tools and platforms used by security operation teams via practical application
- Prepare you to respond like a hacker in real-life attack scenarios and submit recommendations to senior management
- Prepare for the 350-201 CBRCOR core exam
- Earn 40 CE credits toward recertification

Detallierter Kursinhalt

- Understanding Risk Management and SOC Operations
- Understanding Analytical Processes and Playbooks
- Investigating Packet Captures, Logs, and Traffic Analysis

Über Fast Lane

Fast Lane ist weltweit, mehrfach ausgezeichnete(r) Spezialist für Technologie und Business-Trainings sowie Beratungsleistungen zur digitalen Transformation. Als einziger globaler Partner der drei Cloud-Hyperscaler Microsoft, AWS und Google und Partner von 30 weiteren führenden IT-Herstellern bietet Fast Lane beliebig skalierbare Qualifizierungslösungen und Professional Services an. Mehr als 4.000 erfahrene Fast Lane Experten trainieren und beraten Kunden jeder Größenordnung in 90 Ländern weltweit in den Bereichen Cloud, künstliche Intelligenz, Cybersecurity, Software Development, Wireless und Mobility, Modern Workplace sowie Management und Leadership Skills, IT- und Projektmanagement.

Fast Lane Services

- ✓ Highend-Technologietraining
- ✓ Business- & Softskill-Training
- ✓ Consulting Services
- ✓ Managed Training Services
- ✓ Digitale Lernlösungen
- ✓ Content-Entwicklung
- ✓ Remote Labs
- ✓ Talentprogramme
- ✓ Eventmanagement-Services

Trainingsmethoden

- ✓ Klassenraumtraining
- ✓ Instructor-Led Online Training
- ✓ FLEX Classroom – Klassenraum und ILO kombiniert
- ✓ Onsite & Customized Training
- ✓ E-Learning
- ✓ Blended & Hybrid Learning
- ✓ Mobiles Lernen

Technologien und Lösungen

- ✓ Digitale Transformation
- ✓ Artificial Intelligence (AI)
- ✓ Cloud
- ✓ Networking
- ✓ Cyber Security
- ✓ Wireless & Mobility
- ✓ Modern Workplace
- ✓ Data Center
