Detaillierter Kursinhalt

5 Modules:

Module 1

- Deploy and manage Active Directory Domain Services domain controllers
 - This module introduces you to the topology of domain controllers within an Active Directory environment. It also starts you down the path of deploying, managing, and migrating a domain controller between servers.

Module 2

- Create and manage Active Directory objects
 - This module focuses on the tasks associated with creating and managing Active Directory objects and AD domain services domain controllers.

Module 3

- Create and configure Group Policy Objects in Active Directory

- This module focuses on Group Policy objects, including using them to enforce a domain wide as well as fine-grained password policy.

Module 4

- Manage security in Active Directory
 - This module focuses on maintaining security in an Active Directory environment. It covers things from permissions management to authentication methods to identifying problematic accounts

Module 5

- Guided project - Administer Active Directory Domain Services
 - This guided project helps prepare you to manage Active Directory Domain services, including creating and deploying domains, configuring group policy objects, establishing and enforcing passwords, and maintaining security of Active Directory.
