Kursüberblick

This two-day course introduces students to the administration and usage of the Operations Orchestration (OO) software. OO is part of Open Text IT Operations solutions. This course introduces installing, configuring, and upgrading OO. Various concepts such as Worker groups and clustering are explained.

The course consists of focused, task-oriented lectures, text, and a series of detailed hands-on labs to teach the course material to the student.

The hands-on labs use version 2022.11 of the software. This course is intended for workflow developers, system administrators, and other personnel responsible for the implementation of OO.

Highlights:

- Overview of the administration and usage of the OO
- Perform database maintenance
- Configure OO to perform an external authentication
- Analyze performance
- Monitor OO usage
