

Cloud-Native Integration with Red Hat Fuse + EX221 (AD222)

ID AD222 Preis auf Anfrage Dauer 4 Tage

Kursüberblick

Red Hat Fuse, based on the Apache Camel project, is a lightweight, flexible integration platform that enables rapid integration of cloud-native applications, both on-premise and in the cloud.

Camel development is organized around:

- Routes that define a sequence or flow of processing.
- Processors that transform, interpret, and modify messages within a Camel route.
- Components that enable the creation of endpoints that interact with the outside world for acquiring and transmitting data.

Cloud-native Integration with Red Hat Fuse (AD221) emphasizes learning architectural patterns and implementing integration services based on Apache Camel and OpenShift. Camel and Red Hat Fuse enable developers to create complex integrations in a simple and maintainable format. You will learn how to use the most common integration components in Camel and develop, test, and deploy integration focused applications on OpenShift. This course is based on Red Hat Fuse 7.10 and OpenShift 4. The [Red Hat Certified Specialist in Cloud-native Integration exam \(EX221\)](#) is included in this offering.

Zielgruppe

This course is designed for Java developers focused on implementing integration solutions in an enterprise.

Voraussetzungen

- Experience with Java application development or Red Hat Application Development I: Programming in Java EE (AD183).
- Be proficient in using an IDE such as Visual Studio Code.
- Experience with Maven and version control is recommended, but not required.
- Experience with Red Hat OpenShift or Introduction to

OpenShift Applications (DO101) is recommended, but not required.

Kursziele

Impact on the organization

Accelerate cloud-native integration with Red Hat Fuse and Camel, resulting in less development time spent maintaining and designing integration solutions with enterprise patterns.

Impact on the Individual

As a result of taking this course, you will have a strong understanding of fundamental Camel concepts, commonly used Camel components and their configurations, and Camel deployment options. You will also develop a thorough grasp of enterprise integration patterns to solve integration problems.

You will be able to demonstrate these skills:

- Develop Camel routes to integrate systems such as JMS, FTP, Databases, and REST services.
- Filter and transform messages to create integration routes that are highly reliable.
- Develop tests and use mock components to thoroughly test routes.
- Create reliable routes by implementing transactional routes that prevent data loss.
- Deploy Camel routes to Red Hat OpenShift Container Platform.

Recommended next exam or course

Recommended for Developers:

- Red Hat Cloud-native Microservices Development with Quarkus (DO378)
- Developing Event-Driven Applications with Apache Kafka and Red Hat AMQ Streams (AD482)

Recommended for Site Reliability Engineers or Administrators:

- Build and Administer APIs with Red Hat 3scale API

Management (DO240)

- Red Hat JBoss AMQ Administration (AD440)
- Red Hat OpenShift I: Containers & Kubernetes (DO180)
- Red Hat OpenShift Development II: Containerizing Applications (DO288)
- Building Resilient Microservices with Istio and Red Hat OpenShift Service Mesh | DO328

Kursinhalt

- Deploy Fuse applications on Red Hat OpenShift Container Platform
- Implement REST APIs with the Camel REST DSL
- Implement unit tests, error handling, and mocks for Camel routes
- Implement Enterprise Integration Patterns (EIP) using Camel components
- Integrate Camel applications with a database
- Integrate Camel applications with Apache Kafka
- Integrate Cloud-native services using Camel K
- Consume REST services using the Camel HTTP component

Detaillierter Kursinhalt

Introduction to Red Hat Fuse and Camel

- Describe the architecture of Red Hat Fuse and Camel and how they are used to integrate applications.

Create Camel routes

- Implement Camel routes and develop custom processors

Implement enterprise integration patterns

- Describe the most commonly used enterprise integration patterns and implement them using Camel components.

Create tests for routes and error handling

- Develop reliable routes by creating unit tests and mocks, and by handling errors.

Integrate services using asynchronous messaging

- Integrate microservices using Apache Kafka and ActiveMQ (JMS)

Implement transactions

- Provide data integrity in route processing by implementing

transactions.

Build and consume REST services

- Implement and consume REST services with Camel.

Integrate cloud-native services

- Deploy cloud-native microservices based on Camel Routes and Camel K components to an OpenShift cluster

Über Fast Lane

Fast Lane ist weltweiter, mehrfach ausgezeichneter Spezialist für Technologie und Business-Trainings sowie Beratungsleistungen zur digitalen Transformation. Als einziger globaler Partner der drei Cloud-Hyperscaler Microsoft, AWS und Google und Partner von 30 weiteren führenden IT-Herstellern bietet Fast Lane beliebig skalierbare Qualifizierungslösungen und Professional Services an. Mehr als 4.000 erfahrene Fast Lane Experten trainieren und beraten Kunden jeder Größenordnung in 90 Ländern weltweit in den Bereichen Cloud, künstliche Intelligenz, Cybersecurity, Software Development, Wireless und Mobility, Modern Workplace sowie Management und Leadership Skills, IT- und Projektmanagement.

Fast Lane Services

- ✓ Highend-Technologietraining
- ✓ Business- & Softskill-Training
- ✓ Consulting Services
- ✓ Managed Training Services
- ✓ Digitale Lernlösungen
- ✓ Content-Entwicklung
- ✓ Remote Labs
- ✓ Talentprogramme
- ✓ Eventmanagement-Services

Trainingsmethoden

- ✓ Klassenraumtraining
- ✓ Instructor-Led Online Training
- ✓ FLEX Classroom – Klassenraum und ILO kombiniert
- ✓ Onsite & Customized Training
- ✓ E-Learning
- ✓ Blended & Hybrid Learning
- ✓ Mobiles Lernen

Technologien und Lösungen

- ✓ Digitale Transformation
- ✓ Artificial Intelligence (AI)
- ✓ Cloud
- ✓ Networking
- ✓ Cyber Security
- ✓ Wireless & Mobility
- ✓ Modern Workplace
- ✓ Data Center

Weltweit vertreten
mit High-End-Trainingszentren
rund um den Globus

Mehrfach ausgezeichnet
von Herstellern wie AWS, Microsoft,
Cisco, Google, NetApp, VMware
