Course Overview

In this course, you will learn how to deploy Fortinet solutions in the public cloud using various methods. You will learn how to use third-party automation tools to deploy and secure your cloud resources. You will also learn how to effectively troubleshoot common connectivity problems in Azure and AWS, and how to use FortiCNAPP to simplify risk management for your cloud workloads.

This course is intended to help you prepare for the Fortinet NSE 7 - Public Cloud Security Architect exam. This exam is in the FCSS Cloud Security certification track.
