

FortiSOAR Administrator (FORT-SOARADMIN)

ID FORT-SOARADMIN Price on request Duration 2 days

This training is provided by our partner Fortinet.

Familiarity with SOC technologies and processes is recommended.

Important notes for the booking of trainings directly provided by Fortinet

If you are unable to attend the training date you have booked (e.g. illness, etc.) or if Fortinet cancels the course, a credit note is not possible under any circumstances. In both cases of cancellation, the validity of your credit remains for 12 months after the order.

For more information, please refer to the [Fortinet Terms and Conditions](#).

Course Overview

In this course, you will learn about FortiSOAR architecture, and how to deploy, configure, manage, operate, and monitor FortiSOAR in a SoC environment. You will learn about various system customization options, HA deployment, security management using role-based access control (RBAC), and various system monitoring tools.

This course is intended to help you prepare for the Fortinet NSE 6 - FortiSOAR 7.3 Administrator certification exam. This certification is part of the Fortinet Certified Professional - Security Operations certification track.

Who should attend

This course is intended for cybersecurity professionals responsible for planning, deploying, configuring, and managing FortiSOAR deployments in a SoC environment.

Prerequisites

You must have an understanding of the topics covered in the following course, or have equivalent experience:

- NSE 4 FortiGate Security

Course Objectives

After completing this course, you should be able to:

- Identify challenges of security teams, and assist security teams with SOAR best practices
- Identify the role of SOAR in assisting security teams
- Describe the basics of SOAR technology
- Manage licenses
- Deploy and manage FortiSOAR VM
- Configure teams, roles, and users
- Configure authentication
- Schedule the purging of audit logs and executed playbook logs
- Configure playbook recovery
- Configure environment variables
- Configure company branding
- Configure system fixtures
- Configure the recycle bin
- Monitor and manage audit logs
- Use the configuration manager
- Monitor system resources
- Deploy, configure, manage, and troubleshoot a FortiSOAR high availability cluster
- Identify the types of logs used for troubleshooting
- Collect log files used for troubleshooting
- Troubleshoot key services and processes on FortiSOAR

Detailed Course Outline

- 1. Introduction to FortiSOAR
- 2. Device Management
- 3. System Configuration
- 4. High Availability
- 5. Searching, War Rooms, and Upgrading
- 6. System Monitoring and Troubleshooting

About Fast Lane

Fast Lane is a global, award-winning specialist in technology and business training as well as consulting services for digital transformation. As the only global partner of the three cloud hyperscalers- Microsoft, AWS and Google- and partner of 30 other leading IT vendors, Fast Lane offers qualification solutions and professional services that can be scaled as needed.
