

FortiWeb Administrator (FORT-WEB)

ID FORT-WEB **Price** US \$ 2,900.—(excl. tax) **Duration** 3 days

This training is provided by our partner Fortinet.

Important notes for the booking of trainings directly provided by Fortinet

If you are unable to attend the training date you have booked (e.g. illness, etc.) or if Fortinet cancels the course, a credit note is not possible under any circumstances. In both cases of cancellation, the validity of your credit remains for 12 months after the order.

For more information, please refer to the [Fortinet Terms and Conditions](#).

Course Overview

In this course, you will learn about FortiWeb deployment, configuration, and management. You will learn how to set up server objects, define security policies, and implement HA. This course covers protection against advanced threats using data validation, client-side security, and machine learning. You will also explore API security, bot mitigation, and application delivery features such as URL rewriting, single sign-on, caching, and acceleration. Additional topics include DoS prevention, logging, FortiAI integration, compliance standards (PCI DSS, OWASP), and basic troubleshooting.

This exam is part of the FCP Cloud Security certification track.

Who should attend

Security professionals involved in the management, configuration, administration, and monitoring of FortiWeb in small to large enterprise deployments should attend this course.

This course is part of the following Certifications

Fortinet Certified Professional Cloud Security (FCPPCS)

Prerequisites

You must have an understanding of the topics covered in NSE 4 - FortiOS Administrator, or have equivalent experience.

It is also recommended that you have an understanding of the following topics:

- HTTP protocol
- Basic knowledge of HTML, JavaScript, and server-side dynamic page languages, such as PHP

Course Objectives

After completing this course, you will be able to:

- Define web application firewall and describe its role in the network
- Perform basic configuration and initial deployment
- Configure FortiWeb for deployment in a load balanced network environment
- Implement SSL/TLS encryption, including inspection and offloading
- Configure and customize FortiWeb signatures
- Configure FortiWeb to protect against DoS
- Configure API protection and bot mitigation
- Implement FortiWeb machine learning capabilities
- Configure user authentication and access control features
- Configure FortiWeb to ensure Payment Card Industry Data Security Standard (PCI DSS) compliance of your web applications
- Configure FortiWeb to perform HTTP content based routing, rewriting, and redirection
- Perform basic troubleshooting of FortiWeb

Detailed Course Outline

1. Introduction
2. Basic Setup
3. Web Application Security
4. API Discovery and Protection
5. Bot Mitigation
6. Application Delivery
7. Additional Configuration
8. Compliance
9. Troubleshooting

About Fast Lane

Fast Lane is a global, award-winning specialist in technology and business training as well as consulting services for digital transformation. As the only global partner of the three cloud hyperscalers- Microsoft, AWS and Google- and partner of 30 other leading IT vendors, Fast Lane offers qualification solutions and professional services that can be scaled as needed. More than 4,000 experienced Fast Lane professionals train and advise customers in organizations of all sizes in 90 countries worldwide in the areas of cloud, artificial intelligence, cyber security, software development, wireless and mobility, modern workplace, as well as management and leadership skills, IT and project management.
