

## Master Class: Github Copilot Introduction (GHCI)

ID GHCI Price 1,490.— €(excl. tax) Duration 1 day

### Course Overview

GitHub Copilot is the key to programmer productivity in the age of AI. GitHub Copilot is an AI pair programmer that helps you write code faster and with less effort. It pulls context from comments and code to instantly suggest individual lines and entire functions. GitHub Copilot is powered by OpenAI Codex, a generative pre-trained language model created by OpenAI. You can manage GitHub Copilot through personal accounts with GitHub Copilot for Individuals or through organizational accounts with GitHub Copilot for Business. But what is it exactly? But how can you use it? How do you best prepare your data for the copilot? What data protection aspects do you need to consider? This course provides answers, strategic insights, and best practices for moving forward.
