### Course Overview

In this training you will learn several important basic technologies of the .NET Framework 5. Modern CPUs have more and more processors, therefore developers have to master multithreading. APIs of libraries and services are increasingly asynchronous, async and await want to be applied correctly. Background processes run in worker services, for communication between processes we use new gRPC.

- Asynchronous programming (async and await)
- Security und Kryptographie
- Network programming
- Worker Services
- LINQ to XML
- Inter-process communication with gRPC (Google Remote Procedure Call)
- Unit Testing
- Regular Expressions
