

Master Class: SQL Server Performance, Troubleshooting und Security (SQLPTS)

ID SQLPTS **Price 4,995.— €(excl. tax)** **Duration 5 days**

This text was automatically translated. Please click [here](#) to read the original German version.

Course Overview

This 5-day practical workshop is aimed at database administrators who already have basic knowledge of installing and managing MS SQL Server and want to learn more about configuration, optimization, and troubleshooting.

On the other hand, the course is aimed at developers who have SQL knowledge and now want to take the next step to learn, monitor, and optimize advanced functionalities such as stored procedures, transaction programming, and locking behavior.

All topics on the agenda are independently implemented in a separate virtual environment using practical exercises.

Who should attend

The target groups are database administrators who already have knowledge of installing and managing MS SQL Server and want to build on their expertise in the areas of configuration, optimization, and troubleshooting.

Also, developers who want to learn, monitor, and optimize advanced SQL functionalities such as stored procedures, transaction programming, and locking behavior.

Prerequisites

Knowledge in the following areas is desirable:

- Knowledge of MS SQL Server administration
- Knowledge of relational databases
- Knowledge of TSQL language

Course Content

Architecture of the MS SQL Server

- connection logs
- Layer of the database engine
- Life Circle query

Configuring the SQL Server

- Configuring database services
- Storage concepts
- Memory configuration
- processor configuration
- Additional server configurations
- Surface Configuration Manager
- Configuring TempDB

database architecture

- Database components (data and log files, file groups, extents, pages)
- Page structure and page types
- Working with database files (file configuration, shrink file, etc.)

Indices and statistics

- Types of indexes
- Advantages and disadvantages of indices
- Column Stored Index
- Statistics and filtered statistics

safety

- Authorization concepts in SQL Server
- Creating logins, users, roles, and schemas
- Transferring logins
- Working with instances
- Always Encrypted
- Code and data encryption
- Dynamic Data Masking
- Server and database auditing
- Password protection and encryption of backups
- SQL Injection

- Security for SSRS and SSAS

Maintenance of the SQL Server

- Maintenance strategies for indexes, statistics, and databases
- Automation of maintenance jobs
- SSIS DB as storage location for maintenance jobs

Identifying performance bottlenecks

- Reasons for performance bottlenecks
- Strategies for identifying performance bottlenecks
- Using Perfmon to analyze performance parameters
- Overview of the most important performance parameters
- Monitoring events with the Profiler and Extended Events tools
- Monitoring with DMVs and DBCC statements
- Data Collector

Queries and execution plans

- Query processing architecture
- Understanding and interpreting implementation plans
- Using the Database Optimization Advisor to Improve Query Performance
- Benefits of the query store
- Auto Tuning

Optimizing SQL

- 10 tips for high-performance SQL
- Blocking behavior of queries
- Transactions and isolation levels
- Identifying deadlocks
- Influencing execution plans with hints
- Procedures and materialized views
- Use of CLR

In-memory OLTP databases and table compression

About Fast Lane

Fast Lane is a global, award-winning specialist in technology and business training as well as consulting services for digital transformation. As the only global partner of the three cloud hyperscalers- Microsoft, AWS and Google- and partner of 30 other leading IT vendors, Fast Lane offers qualification solutions and professional services that can be scaled as needed. More than 4,000 experienced Fast Lane professionals train and advise customers in organizations of all sizes in 90 countries worldwide in the areas of cloud, artificial intelligence, cyber security, software development, wireless and mobility, modern workplace, as well as management and leadership skills, IT and project management.

Fast Lane Services

- ✓ High End Technology Training
- ✓ Business & Soft Skill Training
- ✓ Consulting Services
- ✓ Managed Training Services
- ✓ Digital Learning Solutions
- ✓ Content Development
- ✓ Remote Labs
- ✓ Talent Programs
- ✓ Event Management Services

Training Methods

- ✓ Classroom Training
- ✓ Instructor-Led Online Training
- ✓ FLEX Classroom – Classroom & Online Hybrid
- ✓ Onsite & Customized Training
- ✓ E-Learning
- ✓ Blended & Hybrid Learning
- ✓ Mobile Learning

Technologies & Solutions

- ✓ Digital Transformation
- ✓ Artificial Intelligence
- ✓ Cloud
- ✓ Networking
- ✓ Cyber Security
- ✓ Wireless & Mobility
- ✓ Modern Workplace
- ✓ Data Center

Worldwide Presence
with high-end training centers
around the globe

Multiple Awards
from vendors such as AWS,
Microsoft, Cisco, Google, NetApp,
VMware

Experienced SMEs
with over 19.000 combined
certifications
