

Microsoft Security Operations Analyst (SC-200T00)

ID SC-200T00 Price 2,590.— €excl. tax Duration 4 days

Course Overview

Learn how to investigate, respond to, and hunt for threats using Microsoft Sentinel, Microsoft Defender XDR and Microsoft Defender for Cloud. In this course you will learn how to mitigate cyberthreats using these technologies. Specifically, you will configure and use Microsoft Sentinel as well as utilize Kusto Query Language (KQL) to perform detection, analysis, and reporting. The course was designed for people who work in a Security Operations job role and helps learners prepare for the exam SC-200: Microsoft Security Operations Analyst.

This Applied Skill is to offer real-world experience in configuring and managing Microsoft Sentinel, a key responsibility in the SC-200 certification:

- [Deploy and configure Azure Monitor \(AZ-1004\)](#)

Who should attend

The Microsoft Security Operations Analyst collaborates with organizational stakeholders to secure information technology systems for the organization. Their goal is to reduce organizational risk by rapidly remediating active attacks in the environment, advising on improvements to threat protection practices, and referring violations of organizational policies to appropriate stakeholders. Responsibilities include threat management, monitoring, and response by using a variety of security solutions across their environment. The role primarily investigates, responds to, and hunts for threats using Microsoft Sentinel, Microsoft Defender XDR, Microsoft Defender for Cloud, and third-party security products. Since the Security Operations Analyst consumes the operational output of these tools, they are also a critical stakeholder in the configuration and deployment of these technologies.

This course is part of the following Certifications

Microsoft Certified: Security Operations Analyst Associate (MCSOAA)

Course Content

- Mitigate threats using Microsoft Defender XDR
- Mitigate threats using Microsoft Copilot for Security
- Mitigate threats using Microsoft Purview
