Fast Lane

Leveraging OpenText™ DevOps Aviator™ to Streamline and Accelerate Delivery with AI (1-5601)

ID 1-5601 **Price** 400.— €(excl. tax) **Duration** 1 day

Important notes for the booking of Open Text trainings

Please note that prepayment is required for participation in an Open Text training course. Participation in a training course is possible for 12 months after booking the course. Cancellations are excluded. For further information, please refer to **our** General Terms and Conditions.

Course Overview

This course explains the concepts of OpenText DevOps Aviator, Generative AI (GenAI) capabilities, and next-generation Large Language Models (LLMs) introduced in OpenText™ Core Software Delivery Platform.

Who should attend

This course is ideal for software testing SMEs, project managers, test managers, test leads, IT professionals, and release managers.

Prerequisites

1-5600 - ValueEdge Essentials

Course Objectives

On completion of this course, participants should be able to:

- Describe the AI capabilities in OpenText Core Software Delivery Platform.
- Improve testing accuracy by using AI to automatically detect defects from video footage, significantly reducing analysis time.
- Accelerate test creation by generating manual test steps through simple AI commands.
- Use AI-driven time-to-market predictions to monitor and forecast feature delivery timelines based on historical data and machine learning.

- Gain an understanding of the AI infrastructure within the OpenText Core Software Delivery Platform.
- Explain licensing models and security best practices for OpenText DevOps Aviator.
- Leverage an AI-powered smart assistant to quickly obtain clear, concise explanations in plain language for features, defects, tasks, user stories, and tests.
- Transform manual test scripts into automated, codeless tests or Gherkin Behavior-Driven Development (BDD) scenarios with the help of AI-generated test automation.

Course Content

This foundational course is designed to help you understand the concepts behind OpenText DevOps Aviator and its powerful AI-driven capabilities. Through a combination of theory and hands-on exercises, you will learn how to leverage Artificial Intelligence (AI) to enhance every stage of the software delivery lifecycle.

In this course, you will learn how to integrate AI within the OpenText Core Software Delivery Platform (previously known as ValueEdge), including infrastructure, deployment options, licensing, and security. You will also discover how to use Smart Assistant to generate tests, identify functional gaps, suggest defect resolutions, and improve request accuracy using images.

You will further learn how to optimize feature development by breaking features into user stories, predicting time-to-market, and reducing risks using AI tools such as root cause analysis.

Additionally, you will learn to use power actions to automate user story generation, create manual tests and codeless scripts from videos, generate reproduction steps, and develop strategies for risk reduction.

Highlights:

- Integrate AI capabilities within OpenText Core Software Delivery Platform.
- Identify the people and use cases that will benefit from

DevOps Aviator.
- Use the capabilities of the Smart Assistant to address a variety of use cases.
- Optimize feature development processes.
- Use power actions in OpenText DevOps Aviator.

About Fast Lane

Fast Lane is a global, award-winning specialist in technology and business training as well as consulting services for digital transformation. As the only global partner of the three cloud hyperscalers- Microsoft, AWS and Google- and partner of 30 other leading IT vendors, Fast Lane offers qualification solutions and professional services that can be scaled as needed. More than 4,000 experienced Fast Lane professionals train and advise customers in organizations of all sizes in 90 countries worldwide in the areas of cloud, artificial intelligence, cyber security, software development, wireless and mobility, modern workplace, as well as management and leadership skills, IT and project management.

Fast Lane Services
✓ High End Technology Training
✓ Business & Soft Skill Training
✓ Consulting Services
✓ Managed Training Services
✓ Digital Learning Solutions
✓ Content Development
✓ Remote Labs
✓ Talent Programs
✓ Event Management Services

Training Methods
✓ Classroom Training
✓ Instructor-Led Online Training
✓ FLEX Classroom – Classroom & Online Hybrid
✓ Onsite & Customized Training
✓ E-Learning
✓ Blended & Hybrid Learning
✓ Mobile Learning

Technologies & Solutions
✓ Digital Transformation
