Operations Bridge Manager (OBM) Service Modeling (3-6319)

ID 3-6319 **Price** 1,600.— €(excl. tax) **Duration** 2 days

Important notes for the booking of Open Text trainings

Please note that prepayment is required for participation in an Open Text training course. Participation in a training course is possible for 12 months after booking the course. Cancellations are excluded. For further information, please refer to **our** General Terms and Conditions.

Course Overview

This course introduces the OpenText™ AI Operations Management Run-time Service Model (RTSM), a framework for improving IT service visibility and intelligence. You will learn to build accurate real-time models, manage configuration and reconciliation, and ensure resilient, data-driven operations.

Prerequisites

To be successful in this course, you should have the following prerequisites or knowledge:

- Basic knowledge of Networking
- Basic knowledge of Configuration Management Systems and ITIL
- Basic knowledge of OBM and APM
- Working knowledge of Windows and UNIX

Course Objectives

On completion of this course, participants should be able to:

- Explain the purpose and architecture of the RTSM.
- Describe how CI management works within RTSM.
- Install and configure a DFP to enable data collection and integration.
- Create and interpret Modeling Queries and Views for service modeling.
- Apply Enrichment rules to enhance and update configuration data.
- Perform Reconciliation to maintain data integrity across systems.

Course Content

The RTSM is a core component of IT operations that enables organizations to maintain accurate service models and make informed decisions. This course provides a comprehensive understanding of how RTSM improves operational visibility and service intelligence, allowing you to monitor and manage complex IT environments effectively. You will learn to build and maintain real-time models through robust configuration management and reconciliation processes.

The course also covers creating custom queries and topology maps to visualize relationships between IT elements, helping you tailor solutions to specific business needs. Additionally, you will master redundancy management techniques to eliminate single points of failure and ensure reliable performance across applications, servers, and networks.

By the end of this course, you will have the skills to deliver seamless, resilient, and data-driven operations that support business continuity and optimize IT service delivery.

Highlights:

- Explain the purpose and architecture of the RTSM and its role in IT operations.
- Describe the principles of configuration management and how Configuration Item (CI) management works.
- Install and configure a Data Flow Probe (DFP) to enable integration between RTSMs.
- Create and interpret modeling queries, views, and topology maps using the HTML5 Web UI.
- Apply enrichment rules to enhance and update configuration data.
- Perform reconciliation processes to maintain data integrity across systems.

About Fast Lane

Fast Lane

Fast Lane is a global, award-winning specialist in technology and business training as well as consulting services for digital transformation. As the only global partner of the three cloud hyperscalers- Microsoft, AWS and Google- and partner of 30 other leading IT vendors, Fast Lane offers qualification solutions and professional services that can be scaled as needed. More than 4,000 experienced Fast Lane professionals train and advise customers in organizations of all sizes in 90 countries worldwide in the areas of cloud, artificial intelligence, cyber security, software development, wireless and mobility, modern workplace, as well as management and leadership skills, IT and project management.
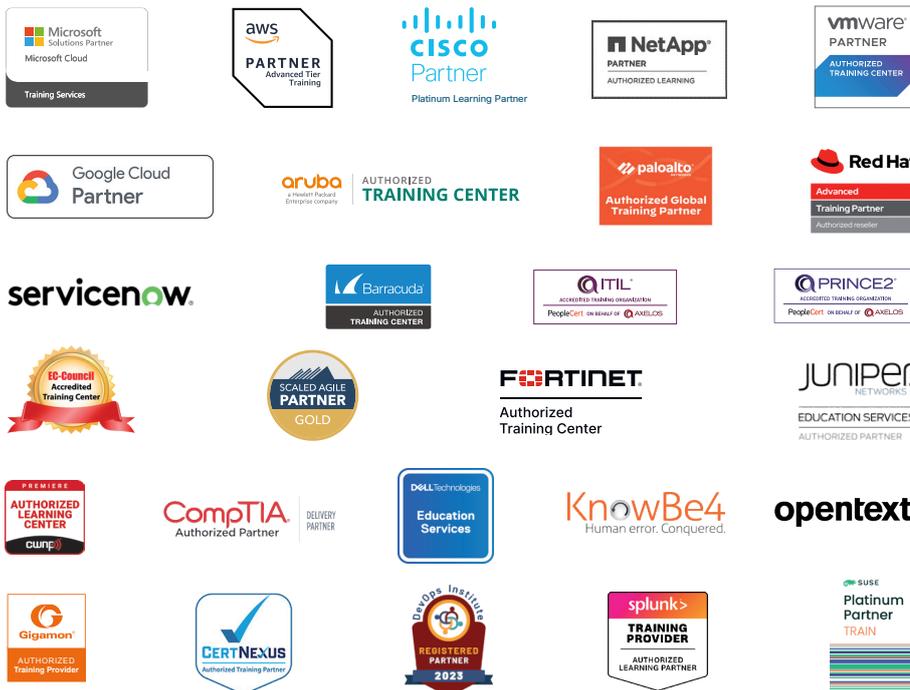

Fast Lane Services

✓ High End Technology Training
✓ Business & Soft Skill Training
✓ Consulting Services
✓ Managed Training Services
✓ Digital Learning Solutions
✓ Content Development
✓ Remote Labs
✓ Talent Programs
✓ Event Management Services

Training Methods

✓ Classroom Training
✓ Instructor-Led Online Training
✓ FLEX Classroom – Classroom & Online Hybrid
✓ Onsite & Customized Training
✓ E-Learning
✓ Blended & Hybrid Learning
✓ Mobile Learning

Technologies & Solutions

✓ Digital Transformation
✓ Artificial Intelligence
✓ Cloud
✓ Networking
✓ Cyber Security
✓ Wireless & Mobility
✓ Modern Workplace
✓ Data Center

Worldwide Presence
with high-end training centers around the globe

Multiple Awards
from vendors such as AWS, Microsoft, Cisco, Google, NetApp, VMware

Experienced SMEs
with over 19.000 combined certifications
