

ArcSight Logger Administration and Operations (3-7306)

ID 3-7306 **Price 3,200.—** €excl. tax **Duration 4 days**

Important notes for the booking of Open Text trainings

Please note that prepayment is required for participation in an Open Text training course. Participation in a training course is possible for 12 months after booking the course. Cancellations are excluded. For further information, please refer to **our** [General Terms and Conditions](#).

Who should attend

Security operators, Network operators

Course Content

This course teaches you the essentials of the ArcSight Logger solution – both hardware and software – as well as giving you information on how to design a complete solution. This instructor-led training course will cover the core features of the ArcSight Logger solution as well as advanced features. This course also prepares you for the Logger certification exam. The exam is administered on the last day of the class and is a hands-on, performance-based exam.

Course Objectives

Upon successful completion of this course, you should be able to:

- Describe, access, and use the basic features and functions of ArcSight Logger
- Install and update Logger
- Configure Logger storage and retention policy settings
- Navigate to specific functions, facilities and configuration settings within the Logger browser UI
- Describe and configure devices, device groups, Receivers, and Forwarders
- Locate and configure Network settings, error logs, remote support access and security certificate trust stores
- Access and manage Logger user/groups
- Explain and implement event indexing and use the Logger search builder to access field-based, full-text and pipeline operator event search facilities
- Create Logger Dashboards and describe the built-in Logger Dashboards and Dashboard panels
- Run reports ad hoc, or as scheduled jobs and publish and archive results according to given distribution and retention criteria
- Search, view, create, edit, enable and disable real-time and scheduled alerts; configure notifications; export alerts for further analysis
- Backup and restore Logger configuration or reports and report definitions; export and import Logger Alerts and Filters; retrieve error and audit logs

About Fast Lane

Fast Lane is a global, award-winning specialist in technology and business training as well as consulting services for digital transformation. As the only global partner of the three cloud hyperscalers- Microsoft, AWS and Google- and partner of 30 other leading IT vendors, Fast Lane offers qualification solutions and professional services that can be scaled as needed. More than 4,000 experienced Fast Lane professionals train and advise customers in organizations of all sizes in 90 countries worldwide in the areas of cloud, artificial intelligence, cyber security, software development, wireless and mobility, modern workplace, as well as management and leadership skills, IT and project management.
