

## NetIQ-Advanced Authentication Administration (AA4200I)

**ID** AA4200I **Price** 2,400.— €(excl. tax) **Duration** 3 days

### Important notes for the booking of Open Text trainings

Please note that prepayment is required for participation in an Open Text training course. Participation in a training course is possible for 12 months after booking the course. Cancellations are excluded. For further information, please refer to **our** [General Terms and Conditions](#).

### Course Overview

This Instructor-Led Training helps you learn about Advanced Authentication 6.3, which provides a single scalable authentication framework for multiple devices and methods. You will learn how to install the Advanced Authentication appliance and the Windows client, configure Advanced Authentication, and use the self-service portal to enroll an authentication method. Also, the Course will cover integration with other products such as SSPR, Sentinel, and Access Manager.

#### Highlights:

- Configuring 2-factor authentication
- Configuring risk
- Configuring HelpDesk

### Who should attend

System Administrators and System Integrators

### Prerequisites

Basic knowledge of two-factor authentication

### Course Objectives

On completion of this course, participants should be able to:

- Describe the features of Advanced Authentication
- Install Advanced Authentication

- Configure Advanced Authentication
- Configure Risk
- Install the Clients
- Configure the HelpDesk module
- Configure integrations
- Maintain Advanced Authentication

### Course Content

#### Chapter 1: Introduction

- How Is Advanced Authentication Better Than Other Solutions?
- Key Features
- Advanced Authentication Server Components
- Architecture
- Terminologies

#### Chapter 2: Installing and Completing Post Installation Configuration

- Setup a virtual machine
- Install the appliance
- Configure a cluster
- Register additional sites and DB and Web servers
- Log in to the NetIQ Administration Portal
- Add a repository

#### Chapter 3: Configuring Advanced Authentication

- Discuss Methods
- Discuss the Chains options
- Discuss the Events options
- Describe the Policies
- List the Server Options
- Test user enrollments
- Add multi-factor
- Skip the second factor
- Sharing authenticators

#### Chapter 4: Installing and Configuring Advanced Authentication Clients and Plugins

- Install and configure Windows and Linux Client.
- Understand and Support Assisted logon.
- Understand CLE Support For Windows clients.

- Learn about various plugins such as RDP, IIS Authentication, etc

## **Chapter 5: Exploring the HelpDesk Module**

- Manage authenticators
- Share authenticators
- Unlock users
- Search for a card holder's information
- Manage tokens
- Manage endpoints
- Monitor a user's authentication activity

## **Chapter 6: Configuring Integrations**

- Configuring Integration with SSPR
- Configuring Integration with NAM
- Configuring Integration with Sentinel

## **Chapter 7: Configuring Risk Settings**

- Configuring Risk Service
- Understanding How Risk Service Works through Scenarios

## **Chapter 8: Maintaining Advanced Authentication**

- Logging
- Disaster Recovery
- Reporting
- Searching a Card Holder's Information
- Troubleshooting

# About Fast Lane

Fast Lane is a global, award-winning specialist in technology and business training as well as consulting services for digital transformation. As the only global partner of the three cloud hyperscalers- Microsoft, AWS and Google- and partner of 30 other leading IT vendors, Fast Lane offers qualification solutions and professional services that can be scaled as needed. More than 4,000 experienced Fast Lane professionals train and advise customers in organizations of all sizes in 90 countries worldwide in the areas of cloud, artificial intelligence, cyber security, software development, wireless and mobility, modern workplace, as well as management and leadership skills, IT and project management.
