Course Overview

This Instructor Led Training helps you learn installation, configuration, and reporting for Identity Governance. The initial configuration would include establishing the configuration of Identity and Applications sources. The additional configuration would consist of configuring roles, policies, reviews, and fulfillment.

Highlights:

- Introduction to the Extremely Focused organization
- Overview of the installation process
- Install the Identity Governance product
- Configure both eDirectory and Active Directory as an Identity Source
- Plan and configure Application Sources
- Describe the difference between Business and Technical Roles
- Create a technical role through mining
- Describe Access Request/Approval policies
- Explain the Separation of Duties policy
- Overview of Reviews
- Overview of Forms and Workflows
- Describe the Reporting Server and its features

Who should attend

Identity Governance Administrators, System Administrators, Identity Architects, and Project Managers

Prerequisites

To be successful in this course, you should have the following prerequisites or knowledge:

- Network communication
- Understanding of Directory Services, including LDAP
- Identity Management solutions
