

Vertica Aggregate Projection Design (VERTAPD)

ID VERTAPD Price 1,600.— €(excl. tax) Duration 2 days

Important notes for the booking of Open Text trainings

Please note that prepayment is required for participation in an Open Text training course. Participation in a training course is possible for 12 months after booking the course. Cancellations are excluded. For further information, please refer to [our General Terms and Conditions](#).

Course Overview

This two-day course teaches students how to manually build projections that aggregate or rearrange data on disk, thereby improving performance of queries that reference aggregated data. These projection types are not created by the Database Designer.

- The course uses videos and a series of hands-on labs to teach the course material.
- The intended audience for this course includes database administrators, product managers, and quality assurance team members. The course assumes students have the attained, at a minimum, the knowledge contained in the Vertica Essentials course; information contained in the Projection Tuning course would also be helpful.
- The content in this course is covered in the Vertica Analyst certification exam.

Highlights

- How to build and test the following projection types:
 - Projections with expressions
 - Live aggregate projections
 - TopK projections
 - Partition range projections
- The advantages and disadvantages of each of these projection types

Who should attend

Database administrators, product managers, and quality assurance team members

Prerequisites

To be successful in this course, you should have the following prerequisites or knowledge:

- Completion of Vertica Essentials (OnDemand or Instructor-led) or equivalent experience
- Completion of Projection Tuning (OnDemand or Instructor-led) would be helpful, but not required
- A basic knowledge of SQL

Course Objectives

On completion of this course, participants should be able to:

- Manually build and test the following projection types:
 - Projections with expressions
 - Live aggregate projections
 - TopK projections
 - Partition range projections
- Describe the advantages and limitations of each of these projection types

Course Content

Module 1: Course Overview

- Introduction to the course
- How to request a lab environment

Module 2: The Lab Environment

- Access the training environment
- Review the environment configuration
- Using the valab utility
- Using the Management Console

Module 3: Overview: Aggregate Projection Types

- Describe the manual projection types, and the scenarios they address

Module 4: Projections With Expressions

- Build and test a projection that includes mathematical expressions
- Identify system table structures for projections with expressions

Module 5: Live Aggregate Projections

- Build and test a projection that uses aggregate functions
- Identify system table structures for live aggregate projections

Module 6: TopK Projections

- Build and test a projection that returns a data subset per analytic function
- Identify system table structures for TopK projections

Module 7: Choosing the Right Projection Type

- Find the most performant projection type for a query

Module 8: Partition Range Projections

- Build and test projections containing a subset of partitioned data
- Identify system table structures for partition range projections

About Fast Lane

Fast Lane is a global, award-winning specialist in technology and business training as well as consulting services for digital transformation. As the only global partner of the three cloud hyperscalers- Microsoft, AWS and Google- and partner of 30 other leading IT vendors, Fast Lane offers qualification solutions and professional services that can be scaled as needed. More than 4,000 experienced Fast Lane professionals train and advise customers in organizations of all sizes in 90 countries worldwide in the areas of cloud, artificial intelligence, cyber security, software development, wireless and mobility, modern workplace, as well as management and leadership skills, IT and project management.

Fast Lane Services

- ✓ High End Technology Training
- ✓ Business & Soft Skill Training
- ✓ Consulting Services
- ✓ Managed Training Services
- ✓ Digital Learning Solutions
- ✓ Content Development
- ✓ Remote Labs
- ✓ Talent Programs
- ✓ Event Management Services

Training Methods

- ✓ Classroom Training
- ✓ Instructor-Led Online Training
- ✓ FLEX Classroom – Classroom & Online Hybrid
- ✓ Onsite & Customized Training
- ✓ E-Learning
- ✓ Blended & Hybrid Learning
- ✓ Mobile Learning

Technologies & Solutions

- ✓ Digital Transformation
- ✓ Artificial Intelligence
- ✓ Cloud
- ✓ Networking
- ✓ Cyber Security
- ✓ Wireless & Mobility
- ✓ Modern Workplace
- ✓ Data Center

Worldwide Presence
with high-end training centers
around the globe

Multiple Awards
from vendors such as AWS,
Microsoft, Cisco, Google, NetApp,
VMware

Experienced SMEs
with over 19.000 combined
certifications
