

# Building Resilient Microservices with Istio and Red Hat OpenShift Service Mesh (DO328)

ID DO328 Price 2,805.— €(excl. tax) Duration 3 days

## Course Overview

### Control, manage, trace, monitor, and test your microservices with Red Hat OpenShift Service Mesh

Building Resilient Microservices with Istio and Red Hat OpenShift Service Mesh (DO328) is an introduction to Red Hat OpenShift Service Mesh that teaches students installation, service monitoring, service resilience, and service security with Red Hat OpenShift Service Mesh.

Red Hat OpenShift created an enterprise-ready, multitenant platform that made deploying and scaling microservice applications efficient and repeatable. But as these architectures become larger and more complex, defining how these services interact with each other is increasingly difficult. Red Hat OpenShift Service Mesh comprises three products: Istio, Jaeger, and Kiali, facilitating a zero-trust network for managing secure service interactions, providing service tracing, and creating a visual representation of communication pathways.

This course is based on Red Hat OpenShift® Container Platform 4.6 and Red Hat OpenShift Service Mesh 2.0.

## Who should attend

This course is designed for developers who want to deploy, manage, and secure microservices applications on Red Hat OpenShift.

## This course is part of the following Certifications

Red Hat Certified Specialist in Building Resilient Microservices (RHCS-BRM)

## Prerequisites

- Take our free assessment to gauge whether this offering is the best fit for your skills.

- Attending [Red Hat Cloud-native Microservices Development with Quarkus \(DO378\)](#) or demonstrating equivalent experience in creating microservice applications is recommended, but not required
- Attending [Red Hat OpenShift Administration I: Operating a Production Cluster \(DO180\)](#) and [Red Hat OpenShift Developer II: Building and Deploying Cloud-native Applications \(DO288\)](#), and passing the [Red Hat Certified OpenShift Application Developer Exam \(EX288\)](#), or possessing basic OpenShift experience, is strongly recommended.

## Course Objectives

### Impact on the organization

Microservice architectures with Red Hat OpenShift Service Mesh enable organizations to improve application security, resilience, and scalability, while decreasing developer overhead. Red Hat OpenShift Service Mesh adds an additional level of security for data in transit with mutual TLS encryption and a zero-trust network. This leads organizations to improved time to market, as well as improved insight into their microservice architecture, by being able to visualize and trace data flow throughout their applications. These insights can dictate better resource allocation for applications as well as more quickly identifying defects in specific microservices.

Red Hat has created this course in a way intended to benefit our customers, but each company and infrastructure is unique, and actual results or benefits may vary.

### Impact on the individual

You will be able to use the concepts in this course to simplify and more efficiently manage their service interactions. You will learn how to install and configure Red Hat OpenShift Service Mesh to define, monitor, manage, and secure service interaction within their microservice architecture. This course is intended to illustrate the ease of Red Hat OpenShift Service Mesh's "sidecar" approach

and to highlight the benefits of service resilience and monitoring that the product provides.

Secure and encrypt services in your application with Red Hat OpenShift Service Mesh.

## **Course Content**

- Install Red Hat OpenShift Service Mesh on a Red Hat OpenShift cluster.
- Apply release strategies by controlling service traffic.
- Build service resilience with load balancing and failovers.
- Test service resilience with chaos testing.
- Enforce service security.
- Observe, measure, and trace network traffic with OpenShift Service Mesh.

## **Detailed Course Outline**

### **Introduction to Red Hat OpenShift Service Mesh**

Describe the basic concepts of microservice architecture and OpenShift Service Mesh.

### **Install Red Hat OpenShift Service Mesh**

Deploy Red Hat OpenShift Service Mesh on Red Hat OpenShift Container Platform.

### **Observe a service mesh**

Trace and visualize an OpenShift Service Mesh with Jaeger and Kiali.

### **Control service traffic**

Manage and route traffic with OpenShift Service Mesh.

### **Release applications with service mesh**

Release applications with canary and mirroring release strategies.

### **Test service resilience with chaos testing**

Gauge the resiliency of Red Hat OpenShift Service Mesh with chaos testing.

### **Build resilient services**

Use OpenShift Service Mesh strategies to create resilient services.

### **Secure services with OpenShift Service Mesh**

# About Fast Lane

Fast Lane is a global, award-winning specialist in technology and business training as well as consulting services for digital transformation. As the only global partner of the three cloud hyperscalers- Microsoft, AWS and Google- and partner of 30 other leading IT vendors, Fast Lane offers qualification solutions and professional services that can be scaled as needed. More than 4,000 experienced Fast Lane professionals train and advise customers in organizations of all sizes in 90 countries worldwide in the areas of cloud, artificial intelligence, cyber security, software development, wireless and mobility, modern workplace, as well as management and leadership skills, IT and project management.

## Fast Lane Services

- ✓ High End Technology Training
- ✓ Business & Soft Skill Training
- ✓ Consulting Services
- ✓ Managed Training Services
- ✓ Digital Learning Solutions
- ✓ Content Development
- ✓ Remote Labs
- ✓ Talent Programs
- ✓ Event Management Services

## Training Methods

- ✓ Classroom Training
- ✓ Instructor-Led Online Training
- ✓ FLEX Classroom – Classroom & Online Hybrid
- ✓ Onsite & Customized Training
- ✓ E-Learning
- ✓ Blended & Hybrid Learning
- ✓ Mobile Learning

## Technologies & Solutions

- ✓ Digital Transformation
- ✓ Artificial Intelligence
- ✓ Cloud
- ✓ Networking
- ✓ Cyber Security
- ✓ Wireless & Mobility
- ✓ Modern Workplace
- ✓ Data Center

**Worldwide Presence**  
with high-end training centers  
around the globe

**Multiple Awards**  
from vendors such as AWS,  
Microsoft, Cisco, Google, NetApp,  
VMware

**Experienced SMEs**  
with over 19.000 combined  
certifications
