

# Automate and Manage Red Hat OpenShift Virtualization with Ansible + Exam (EX336) (DO337)

ID DO337 Price on request Duration 3 days

## Course Overview

The [Red Hat Certified Specialist in Automating OpenShift Virtual Machine Management Exam \(EX336\)](#) is included in this offering.

## Who should attend

- Virtual Machine Administrators who are interested in moving virtualized workloads from traditional hypervisors to OpenShift Virtualization
- Enterprise architects, system administrators, and automation architects who are responsible for designing, managing, and automating an organization's virtual machine infrastructure.

## Prerequisites

- [Red Hat Certified Specialist in OpenShift Virtualization \(EX316\)](#) or equivalent knowledge of managing virtual machines in Red Hat OpenShift.
- This course requires no previous experience with Ansible, however, learners are encouraged to attend, before taking DO336:  
Ansible Basics - Automation Technical Overview (DO0007).
- Although Linux skills are not required for managing OpenShift clusters and OpenShift Virtualization, operating individual Linux VMs requires Linux sysadmin skills that the following courses provide:  
[Red Hat System Administration I \(RH124\)](#) and [Red Hat System Administration II \(RH134\)](#) or managing the operating system inside a Linux VM.

## Course Objectives

### Impact on the Organization

Automate and Manage Red Hat OpenShift Virtualization with Ansible teaches how to deploy the Ansible Automation Platform operator in an OpenShift cluster to migrate and manage virtual machines. Customers migrating to Red Hat OpenShift

Virtualization from other hypervisors need an automation solution to replace their previous automation products, such as vRealize Orchestrator by VMware. With Ansible Automation Platform, customers can automate the migration, creation, and management of the virtual machines in OpenShift Virtualization.

### Impact on the Individual

Automate and Manage Red Hat OpenShift Virtualization with Ansible teaches students how to deploy and configure the Red Hat Ansible Automation Platform Operator, automation controller, and automation hub operator instance in a Red Hat OpenShift cluster. Students will learn how to automate the migration of virtual machines from another hypervisor to Red Hat OpenShift Virtualization by using Ansible Automation Platform and the migration toolkit for virtualization (MTV) operators. Students also learn how to add Ansible Playbooks and collections for OpenShift Virtualization to an Ansible Automation Platform hub instance and how to use Ansible Playbooks and collections to create and manage virtual machines in Red Hat OpenShift Virtualization.

## Course Content

**Learn how to use Red Hat Ansible Automation Platform to automate the migration and management of virtual machines in Red Hat OpenShift Virtualization.**

Automate and Manage Red Hat OpenShift Virtualization with Ansible (DO336) is designed for virtual machine administrators interested in automating migration and management tasks of virtual machines in OpenShift Virtualization by using the Ansible Automation Platform operator.

This course provides the following information and skills:

- An introduction to fundamental concepts of Ansible and Ansible Automation Platform
- Skills to deploy the Ansible Automation Platform operator, automation controller, and private automation hub instance

- in a Red Hat OpenShift cluster
- Strategies to migrate virtual machines from another hypervisor to OpenShift Virtualization by using the migration toolkit for virtualization operator and Ansible Automation Platform
- Skills to automate Day-2 tasks that help manage the entire VM lifecycle, such as provisioning virtual machines and supporting Kubernetes resources, managing compute resources and network devices, and installing software packages.

Following course completion, you will receive a 45-day extended access to hands-on labs for any course that includes a virtual environment.

### Course Content Summary

- Introduction to the fundamentals concepts, use cases, and architecture of Ansible and Ansible Automation Platform
- Deploying and configuring the Ansible Automation Platform operator, automation controller, and private automation hub in a Red Hat OpenShift cluster
- Migrating virtual machines from another hypervisor to Red Hat OpenShift Virtualization by using the migration toolkit for virtualization operator and Ansible Automation Platform
- Automating the creation and management of virtual machines in a Red Hat OpenShift Virtualization cluster by using the Ansible Automation Platform operator

### Detailed Course Outline

#### Introducing Red Hat Ansible Automation Platform

Explain the need for automation, fundamental concepts of Ansible, and the architecture and use cases for Ansible and the Ansible Automation Platform Operator in a Red Hat OpenShift cluster.

#### Deploying and Configuring the Red Hat Ansible Automation Platform Operator

Deploy and configure the Red Hat Ansible Automation Platform Operator, automation controller, automation hub operator instance in a Red Hat OpenShift Container Platform cluster.

#### Migrating Virtual Machines to Red Hat OpenShift Virtualization with Ansible Automation Platform

Migrate virtual machines from a compatible hypervisor to Red Hat OpenShift Virtualization by using Ansible Automation Platform and the migration toolkit for virtualization (MTV) operator.

#### Automating Day-2 Operations for Virtual Machines in Red Hat

#### OpenShift Virtualization with Red Hat Ansible Automation Platform

Automate the creation and management of virtual machines in a Red Hat OpenShift Virtualization cluster by using the Ansible Automation Platform operator.

# About Fast Lane

Fast Lane is a global, award-winning specialist in technology and business training as well as consulting services for digital transformation. As the only global partner of the three cloud hyperscalers- Microsoft, AWS and Google- and partner of 30 other leading IT vendors, Fast Lane offers qualification solutions and professional services that can be scaled as needed. More than 4,000 experienced Fast Lane professionals train and advise customers in organizations of all sizes in 90 countries worldwide in the areas of cloud, artificial intelligence, cyber security, software development, wireless and mobility, modern workplace, as well as management and leadership skills, IT and project management.

## Fast Lane Services

- ✓ High End Technology Training
- ✓ Business & Soft Skill Training
- ✓ Consulting Services
- ✓ Managed Training Services
- ✓ Digital Learning Solutions
- ✓ Content Development
- ✓ Remote Labs
- ✓ Talent Programs
- ✓ Event Management Services

## Training Methods

- ✓ Classroom Training
- ✓ Instructor-Led Online Training
- ✓ FLEX Classroom – Classroom & Online Hybrid
- ✓ Onsite & Customized Training
- ✓ E-Learning
- ✓ Blended & Hybrid Learning
- ✓ Mobile Learning

## Technologies & Solutions

- ✓ Digital Transformation
- ✓ Artificial Intelligence
- ✓ Cloud
- ✓ Networking
- ✓ Cyber Security
- ✓ Wireless & Mobility
- ✓ Modern Workplace
- ✓ Data Center

**Worldwide Presence**  
with high-end training centers  
around the globe

**Multiple Awards**  
from vendors such as AWS,  
Microsoft, Cisco, Google, NetApp,  
VMware

**Experienced SMEs**  
with over 19.000 combined  
certifications
