

# Red Hat Security: Identity Management and Active Directory Integration (RH362)

**ID RH362** **Price** 3,740.— €excl. tax **Duration** 4 days

## Course Overview

Provide help to secure, centralized identity management services to coordinate user authentication and authorization with client systems, network services, and Windows domains.

Red Hat Security: Identity Management and Authentication (RH362) provides the skills to configure and manage Identity Management (IdM), the comprehensive identity management component bundled with Red Hat Enterprise Linux. This course helps students to gain the skills with this technology most requested by customers.

Some topics covered in this course are central management and provisioning of user accounts; design and installation of IdM server topologies; operation of the integrated DNS and TLS Certificate Authority services; management of two-factor authentication, smart card authentication, and operation as a single-sign on provider; integration and management of two-way trusts with Active Directory; and troubleshooting and disaster recovery planning. Registration of Linux clients to IdM and operation in enterprise environments that use both Linux and Microsoft Windows clients and servers is discussed.

Following course completion, you will receive a 45-day extended access to hands-on labs for any course that includes a virtual environment.

## Who should attend

Red Hat Certified System Engineers (RHCE) who wish to learn how to provision and configure centralized identity management solutions for Linux clients and how to integrate them with other network services and identity management systems.

- Identity Management specialists or engineers
- Access Management specialists or engineers

## This course is part of the following Certifications

Red Hat Certified Specialist in Identity Management (RHCS-IM)

## Prerequisites

- Take our free assessment to gauge whether this offering is the best fit for your skills.
- An RHCE certification or equivalent skill is a prerequisite to this course.

## Course Objectives

### Impact on the organization

Businesses will be able to integrate and centralize lifecycle management and security policy implementation and enforcement, and extend that consolidated management to additional enterprise configuration management products from the Red Hat portfolio, including Red Hat Ansible Automation Platform and Red Hat Satellite Server.

### Impact on the individual

As a result of attending this course, you will gain an understanding of the architecture of an identity management realm and trusted relationships using both Identity Management in Red Hat Enterprise Linux and Microsoft Active Directory. You will be able to create, manage, and troubleshoot user management structures, security policies, local and remote secure access methods, and implementation technologies such as SSSD, Kerberos, PKI, and certificates.

## Course Content

- Design an Identity Management topology for scale and resiliency.
- Describe key technologies used by IdM, including SSSD, PAM, Kerberos, and PKI.
- Install Identity Management (IdM) servers, replicas, and clients using Ansible Playbooks.

- Manage IdM services, including integrated DNS and CA.
- Configure and manage Kerberos authentication and secure services.
- Configure and manage TLS certificates.
- Create and manage a trust relationship with Microsoft Active Directory.
- Configure to help secure user authentication, including two-factor authentication and single sign-on.
- Configure and manage Sudo, HBAC, and RBAC policies.
- Manage secrets, vaults, certificates, and keys.
- Troubleshoot identity management.
- Integrate Satellite 6 and Red Hat Ansible Automation Platform with IdM.
- Configure IdM backup and recovery.

users, credentials, policies, and access rights.

#### Detailed Course Outline

- Identity Management in Red Hat Enterprise Linux
- Introduce Identity Management in Red Hat Enterprise Linux (IdM) and its high-level architecture.
- Identity Management Core Technologies
- Review the core technologies of Identity Management (IdM) in Red Hat Enterprise Linux.
- Installing Identity Management in Red Hat Enterprise Linux
- Install Identity Management servers, replicas, and clients on Red Hat Enterprise Linux 9.
- Implementing an Identity Management Topology
- Implement continuous functionality and high availability of IdM services in single-site and geographically distributed topologies.
- Managing the CA and DNS Integrated Services
- Manage the Certificate Authority (CA) and the Domain Name System (DNS) services that are integrated with Identity Management.
- Managing Users and Controlling User Access
- Configure users for authorized access to services and resources.
- Configuring Alternative Authentication Services
- Configure and manage smart card authentication, secrets, and two-factor authentication.
- Integrating Identity Management with Active Directory
- Implement a cross-forest trust between Identity Management and Active Directory, and configure ID views to map POSIX attributes to Active Directory users.
- Integrating Identity Management with Red Hat Utilities
- Integrate an Identity Management deployment with Red Hat Satellite and Red Hat Ansible Automation Platform.
- Troubleshooting and Disaster Recovery Planning for IdM
- Troubleshooting and preparing for disaster recovery with Identity Management.
- Comprehensive Review
- Build a small, resilient Identity Management topology to include multiple replicas and clients, populated with multiple

# About Fast Lane

Fast Lane is a global, award-winning specialist in technology and business training as well as consulting services for digital transformation. As the only global partner of the three cloud hyperscalers- Microsoft, AWS and Google- and partner of 30 other leading IT vendors, Fast Lane offers qualification solutions and professional services that can be scaled as needed. More than 4,000 experienced Fast Lane professionals train and advise customers in organizations of all sizes in 90 countries worldwide in the areas of cloud, artificial intelligence, cyber security, software development, wireless and mobility, modern workplace, as well as management and leadership skills, IT and project management.

## Fast Lane Services

- ✓ High End Technology Training
- ✓ Business & Soft Skill Training
- ✓ Consulting Services
- ✓ Managed Training Services
- ✓ Digital Learning Solutions
- ✓ Content Development
- ✓ Remote Labs
- ✓ Talent Programs
- ✓ Event Management Services

## Training Methods

- ✓ Classroom Training
- ✓ Instructor-Led Online Training
- ✓ FLEX Classroom – Classroom & Online Hybrid
- ✓ Onsite & Customized Training
- ✓ E-Learning
- ✓ Blended & Hybrid Learning
- ✓ Mobile Learning

## Technologies & Solutions

- ✓ Digital Transformation
- ✓ Artificial Intelligence
- ✓ Cloud
- ✓ Networking
- ✓ Cyber Security
- ✓ Wireless & Mobility
- ✓ Modern Workplace
- ✓ Data Center

**Worldwide Presence**  
with high-end training centers  
around the globe

**Multiple Awards**  
from vendors such as AWS,  
Microsoft, Cisco, Google, NetApp,  
VMware

**Experienced SMEs**  
with over 19.000 combined  
certifications
