Cloud Provisioning and Governance Fundamentals (CPGF)

ID CPGF   **Price** 2,256.— €(excl. tax)   **Duration** 3 days

Important notes for the booking of ServiceNow trainings

1. 1. So that we can finally process your registration, you will receive an enrollment request after booking the course. Please carry out the enrollment immediately, at the latest **three** working days before the start of the course, according to the following instructions at ServiceNow: Enrol for Instructor Led Training using Learning Credits
2. Please note that we must receive short-term bookings no later than five working days before the course begins.
3. If you are unable to attend the training date you have booked (e.g. illness, etc.) or if ServiceNow cancels the course, a credit note is not possible under any circumstances. If you cancel, you can name a replacement person. In both cases of cancellation, the validity of your credit remains for 12 months after the order.

For more information, please refer to the **ServiceNow Terms and Conditions.**.

Course Overview

Attend Cloud Provisioning and Governance Fundamentals (CPGF) to learn how to configure the Cloud Provisioning and Governance application for a multi-cloud environment.

Cloud Provisioning and Governance Fundamentals (CPGF) is designed to help students understand how to use and configure the Cloud Provisioning and Governance (CPG) application for a multi-cloud environment. Upon completion of the course, students will have gained experience in how to set up their Cloud User Portal, how to deploy VMs using cloud native templates and Terraform, and how to control cloud sprawl by using Cloud Management approval policies and capacity limits.

In this interactive course attendees will master the setup, configuration, and usage of the Cloud Provisioning and Governance application, with a focus on:

- Cloud User Portal overview
- Cloud Admin Portal overview
- Setting up and configuring AWS, Azure and VMware with CPG
- Overview of Resource Profiles
- Identity and Permissions
- Troubleshooting CPG
- Templates Overview and their use in CPG
- Understanding Policy

This course is part of the following Certifications

Certified Implementation Specialist – Cloud Provisioning and Governance (CIS-CM)

Prerequisites

Students interested in taking the class should have completed the ServiceNow Fundamentals course or have equivalent experience. It is also recommended that students taking the course have a working knowledge of Windows Server Administration, Linux Server Administration, VMware, JavaScript, JSON, and either AWS or Azure Cloud technologies.

Course Objectives

- Learn how to use the Cloud User Portal
- Set up and configure AWS, Azure and VMware with CPG using the Cloud Admin Portal
- Overview of Resource Profiles
- Identity and Permissions
- Troubleshoot CPG
- Templates Overview and their use in CPG
- Understand Policy
