Course Overview

Learn how to create and present convincing presentations using PowerPoint in the shortest possible time with this compact course. Supported by easy-to-understand, practical examples and tips, we show you how to work cleverly and goal-oriented with PowerPoint.

On the very first pages, you will learn all the basic aspects of PowerPoint using an easy-to-follow example - from opening and viewing a presentation to adding new slides to saving and printing. Thus, after the first chapter, you will not only have understood the essential basics of working with PowerPoint, but also experienced them in practice.

After you have received an overview of the basic possibilities of PowerPoint, you will gradually learn all PowerPoint features that may be important in later practice, such as formatting text or inserting images. In this way, you can expand your PowerPoint skills step by step as required. In addition, "PowerPoint 2019 - Basic course compact" also provides you with valuable services as a reference work again and again.

- Quick start and operating concept
- Entering, revising and structuring slide texts
- Format slide contents
- Add images, transitions and animations
