VMware NSX: Design [V4.x] (NSXTD4)

ID NSXTD4 **Price** 3,980.— €(excl. tax) **Duration** 5 days

Course Overview

This five-day course provides comprehensive training on considerations and practices to design a VMware NSX® environment as part of a software-defined data center strategy. This course prepares the student with the skills to lead the design of an NSX environment, including design principles, processes, and frameworks. The student gains a deeper understanding of the NSX architecture and how it can be used to create solutions to address the customer's business needs.

Product Alignment

- VMware NSX 4.1.0

Who should attend

Network and security architects and consultants who design the enterprise and data center networks and NSX environments

This course is part of the following Certifications

VMware Certified Professional – Network Virtualization (VCP-NV)
VMware Certified Advanced Professional – Network Virtualization Design (VCAP-NV DESIGN)

Prerequisites

Before taking this course, you must complete the following course:

- VMware NSX: Install, Configure, Manage [V4.0] (NSXICM4)
