

VMware NSX-T Data Center: Migration from NSX Data Center for vSphere (NSXTVS)

ID NSXTVS Price 2,250.— €(excl. tax) **Duration 3 days**

This Advanced course is delivered directly by VMware.

Course Overview

This three-day, hands-on training course provides you with the skills, techniques, and tools required to successfully migrate your current VMware NSX® Data Center for vSphere® environment to VMware NSX-T™ Data Center.

In this course, you learn to choose between different migration approaches and to perform the type of migration that best suits your current environment. In addition, you are presented with common migration problems and resolutions.

Product Alignment

- VMware NSX-T Data Center 3.x

Who should attend

- Experienced system administrators and network administrators
- Network and security professionals who work with enterprise and data center networks

Prerequisites

Before taking this course, you should have completed the [VMware NSX-T Data Center: Install, Configure, Manage \[V3.2\] \(NSXTICM32\)](#) course.

You should also have the following understanding or knowledge:

- Good understanding of TCP/IP services and protocols
- Knowledge and working experience of computer networking, including:
 - Switching and routing technologies (L2-L3)
 - Network and application delivery services (L4-L7)
- Knowledge of and working experience with VMware

vSphere® environments

The VMware Certified Professional – Network Virtualization (2020) certification is recommended.

Course Objectives

By the end of the course, you should be able to meet the following objectives:

- Contrast the NSX-T Data Center architecture with the architecture of NSX Data Center for vSphere
- Understand the networking and security features of NSX-T Data Center
- Compare In-Place and Lift and Shift migration approaches
- Describe the networking topologies supported by the Migration Coordinator
- Perform In-Place migrations using the Migration Coordinator
- Troubleshoot In-Place migrations
- Describe Lift and Shift migration tools and techniques
- Troubleshoot Lift and Shift migrations

Course Content

Course Introduction

- Introduction and course logistics
- Course objectives

Introduction to NSX-T Data Center

- Describe the motivation for migrating to NSX-T Data Center
- Contrast the NSX-T Data Center architecture with the architecture of NSX Data Center for vSphere.
- Describe the logical switching components in NSX-T Data Center
- Describe the components and functions of NSX-T Data Center logical routing
- Describe the security features of NSX-T Data Center
- Explain the implementation of networking services in NSX-T Data Center

Migration Techniques

- Describe In-Place migration
- Describe Lift and Shift migration
- Compare migration approaches
- Determine the best migration strategy based on requirements

In-Place Migration Topologies

- Identify the NSX Data Center for vSphere topologies supported by the Migration Coordinator
- Explain how network and security objects are translated from NSX Data Center for vSphere to NSX-T Data Center

In-Place Migration Using the Migration Coordinator

- Describe prerequisites for In-Place migration
- Prepare the NSX Data Center for vSphere environment for migration with the Migration Coordinator
- Migrate the NSX Data Center for vSphere environment with the Migration Coordinator
- Perform post-migration tasks
- Describe the vSphere Networking Migration feature

Troubleshooting In-Place Migration

- Troubleshoot issues based on the In-Place migration workflow
- Identify log files used in troubleshooting In-Place migration
- Identify and resolve common issues related to the Migration Coordinator

Lift and Shift Migration Approaches

- Describe prerequisites for Lift and Shift migrations
- Perform Lift and Shift migrations using L2 bridging
- Perform Lift and Shift migrations using VMware HCX
- Compare migration using L2 Bridging and VMware HCX®

Troubleshooting Lift and Shift Migration

- Troubleshoot Lift and Shift migration problems
- Identify log files used in troubleshooting Lift and Shift migrations
- Identify and resolve common issues related to Lift and Shift migrations.

About Fast Lane

Fast Lane is a global, award-winning specialist in technology and business training as well as consulting services for digital transformation. As the only global partner of the three cloud hyperscalers- Microsoft, AWS and Google- and partner of 30 other leading IT vendors, Fast Lane offers qualification solutions and professional services that can be scaled as needed. More than 4,000 experienced Fast Lane professionals train and advise customers in organizations of all sizes in 90 countries worldwide in the areas of cloud, artificial intelligence, cyber security, software development, wireless and mobility, modern workplace, as well as management and leadership skills, IT and project management.

Fast Lane Services

- ✓ High End Technology Training
- ✓ Business & Soft Skill Training
- ✓ Consulting Services
- ✓ Managed Training Services
- ✓ Digital Learning Solutions
- ✓ Content Development
- ✓ Remote Labs
- ✓ Talent Programs
- ✓ Event Management Services

Training Methods

- ✓ Classroom Training
- ✓ Instructor-Led Online Training
- ✓ FLEX Classroom – Classroom & Online Hybrid
- ✓ Onsite & Customized Training
- ✓ E-Learning
- ✓ Blended & Hybrid Learning
- ✓ Mobile Learning

Technologies & Solutions

- ✓ Digital Transformation
- ✓ Artificial Intelligence
- ✓ Cloud
- ✓ Networking
- ✓ Cyber Security
- ✓ Wireless & Mobility
- ✓ Modern Workplace
- ✓ Data Center

Worldwide Presence
with high-end training centers
around the globe

Multiple Awards
from vendors such as AWS,
Microsoft, Cisco, Google, NetApp,
VMware

Experienced SMEs
with over 19.000 combined
certifications
