

VMware vRealize Operations: Install, Configure, Manage [V8.6] (VROICM86)

ID VROICM86 **Price 3,440.— €(excl. tax)** **Duration 5 days**

Course Overview

This five-day, hands-on training course provides you with the knowledge and skills to deploy a VMware vRealize® Operations™ cluster that meets the monitoring requirements of your environment. This course includes advanced capabilities such as customizing alerts, views, reports, and dashboards and explains the architecture in vRealize Operations. This course explains application monitoring, certificates, capacity and cost concepts, and workload optimization with real-world use cases. This course covers troubleshooting using the workbench, alerts, and redefined dashboards and describes how to manage compliance and configurations. This course also covers several management packs.

Product Alignment

- VMware vSphere 7.0.3
- VMware vRealize® Operations™ 8.6

Who should attend

- Experienced system administrators and system integrators
- Consultants responsible for designing, implementing, and customizing vRealize Operations

This course is part of the following Certifications

VMware Certified Professional – Cloud Operations 2024 (VCP-CO 2024)

VMware Certified Advanced Professional – Cloud Management and Automation Design 2024 (VCAP-CMA DESIGN 2024)

Prerequisites

Before taking this course, you must complete at least one the following:

- VMware vSphere: Install, Configure, Manage
- 6 months hands-on vRealize Operations experience

Course Objectives

By the end of the course, you should be able to meet the following objectives:

- List the vRealize Operations use cases
- Identify features and benefits of vRealize Operations
- Determine the vRealize Operations cluster that meets your monitoring requirements
- Deploy and configure a vRealize Operations cluster
- Use interface features to assess and troubleshoot operational issues
- Describe vRealize Operations certificates
- Create policies to meet the operational needs of your environment
- Recognize effective ways to optimize performance, capacity, and cost in data centers
- Troubleshoot and manage problems using workbench, alerts, and predefined dashboards
- Manage configurations
- Configure application monitoring using VMware vRealize® Application Remote Collector™
- Create custom symptoms and alert definitions, reports, and views
- Create various custom dashboards using the dashboard creation canvas
- Configure widgets and widget interactions for dashboards
- Create super metrics
- Set up users and user groups for controlled access to your environment
- Extend the capabilities of vRealize Operations by adding management packs and configuring solutions
- Monitor the health of the vRealize Operations cluster by using self-monitoring dashboards

Course Content

- Course Introduction
- Introduction to vRealize Operations
- vRealize Operations Architecture
- Deploying vRealize Operations
- vRealize Operations Concepts
- vRealize Operations Policies and Certificate Management

- Capacity Optimization
- What-If Scenarios and Costing in vRealize Operations
- Performance Optimization
- Troubleshooting and Managing Configurations
- Application Monitoring in vRealize Operations
- Custom Alert, Views, and Reports
- Custom Dashboards
- Super Metrics
- User Access Control
- Extending and Managing a vRealize Operations Deployment

Detailed Course Outline

Course Introduction

- Introduction and course logistics
- Course objectives

Introduction to vRealize Operations

- List the vRealize Operations use cases
- Access the vRealize Operations User Interface (UI)

vRealize Operations Architecture

- Identify the functions of components in a vRealize Operations node
- Identify the types of nodes and their role in a vRealize Operations cluster
- Outline how high availability is achieved in vRealize Operations
- List the components required to enable Continuous Availability (CA)

Deploying vRealize Operations

- Design and size a vRealize Operations cluster
- Deploy a vRealize Operations node
- Install a vRealize Operations instance
- Describe the different vRealize Operations deployment scenarios

vRealize Operations Concepts

- Identify the product UI components
- Create and use tags to group objects
- Use a custom group to group objects

vRealize Operations Policies and Certificate Management

- Describe the vRealize Operations certificates
- Create policies for the various types of workloads

- Explain how policy inheritance works

Capacity Optimization

- Define the capacity planning terms
- Explain the capacity planning models
- Assess the overall capacity of a data center and identify the optimization recommendations

What-If Scenarios and Costing in vRealize Operations

- Run what-if scenarios for adding workloads to a data center
- Discuss the types of cost drivers in vRealize Operations
- Assess the cost of your data center inventory

Performance Optimization

- Introduction to performance optimization
- Define the business and operational intentions for a data center
- Automate the process of optimizing and balancing workloads in data centers
- Report the results of the optimization potential

Troubleshooting and Managing Configurations

- Describe the troubleshooting workbench
- Recognize how to troubleshoot problems by monitoring alerts
- Use step-by-step workflows to troubleshoot the different vSphere objects
- Assess your environment's compliance to standards
- View the configurations of vSphere objects in your environment

Application Monitoring in vRealize Operations

- Describe the native service discovery and application monitoring features
- Configure the application monitoring
- Monitor the operating systems and applications by using vRealize Application Remote Collector

Custom Alert, Views, and Reports

- Create the symptom definitions
- Create the recommendations, actions, and notifications
- Create the alert definitions that monitor resource demand in hosts and VMs
- Build and use the custom views in your environment
- Create the custom reports for presenting data about your environment

Custom Dashboards

- Create the dashboards that use the predefined and custom widgets
- Configure the widgets to interact with the other widgets and other dashboards
- Configure the Scoreboard widget to use a metric configuration file
- Manage the dashboards by grouping dashboards and sharing dashboards with users

Super Metrics

- Recognize the different types of super metrics
- Create super metrics and associate them with objects
- Enable super metrics in policies

User Access Control

- Recognize how users are authorized to access objects
- Determine privilege priorities when a user has multiple privileges
- Import users and user groups from an LDAP source

Extending and Managing a vRealize Operations Deployment

- Identify the available management packs in VMware Marketplace™
- Monitor the health of a vRealize Operations cluster
- Generate a support bundle
- View the vRealize Operations log files and audit reports
- Perform the vRealize Operations cluster management tasks

About Fast Lane

Fast Lane is a global, award-winning specialist in technology and business training as well as consulting services for digital transformation. As the only global partner of the three cloud hyperscalers- Microsoft, AWS and Google- and partner of 30 other leading IT vendors, Fast Lane offers qualification solutions and professional services that can be scaled as needed. More than 4,000 experienced Fast Lane professionals train and advise customers in organizations of all sizes in 90 countries worldwide in the areas of cloud, artificial intelligence, cyber security, software development, wireless and mobility, modern workplace, as well as management and leadership skills, IT and project management.

Fast Lane Services

- ✓ High End Technology Training
- ✓ Business & Soft Skill Training
- ✓ Consulting Services
- ✓ Managed Training Services
- ✓ Digital Learning Solutions
- ✓ Content Development
- ✓ Remote Labs
- ✓ Talent Programs
- ✓ Event Management Services

Training Methods

- ✓ Classroom Training
- ✓ Instructor-Led Online Training
- ✓ FLEX Classroom – Classroom & Online Hybrid
- ✓ Onsite & Customized Training
- ✓ E-Learning
- ✓ Blended & Hybrid Learning
- ✓ Mobile Learning

Technologies & Solutions

- ✓ Digital Transformation
- ✓ Artificial Intelligence
- ✓ Cloud
- ✓ Networking
- ✓ Cyber Security
- ✓ Wireless & Mobility
- ✓ Modern Workplace
- ✓ Data Center

Worldwide Presence
with high-end training centers
around the globe

Multiple Awards
from vendors such as AWS,
Microsoft, Cisco, Google, NetApp,
VMware

Experienced SMEs
with over 19.000 combined
certifications
