ID JSE Preis 2.430,— € (exkl. MwSt.) Dauer 3 Tage

Kursüberblick

This three-day course is designed to provide students with the knowledge required to manage the Junos Space appliance and manage devices with Junos Space. Students will understand how to install Junos Space into a multinode Space Fabric, as well as learn how to administer and monitor the Fabric. Centralized Junos device management options offered by the Junos Space Network Management Platform will be explored, including configuration backup, synchronization, Junos image distribution, and application of templates. Students will also learn how to use Junos Space applications, such as Service Now and Service Insight.

Through demonstrations and hands-on labs, students will gain experience installing Junos Space into a multinode Space Fabric, navigating the administrative environment, monitoring the Fabric, performing schema updates, and using Junos Space applications. This course uses the Junos Space virtual appliance for the hands-on component and is based on Junos Space Release 17.1R1.7.

Zielgruppe

This course benefits individuals responsible for managing Junos devices using the Junos Space software.

Voraussetzungen

Students should have experience with the Junos operating system, including device management, administration, and monitoring. Students should also attend the [Introduction to the Junos Operating System \(IJOS\)](#) course prior to attending this class.
