

# Red Hat System Administration I (RH124)

**ID** RH124 **Price** 2,880.— €(excl. tax) **Duration** 5 days

## Course Overview

**Get started building skills to perform the key tasks needed to become a full-time Linux administrator.**

Red Hat System Administration I (RH124) is designed for IT professionals without previous Linux system administration experience. The course provides students with Linux administration competence by focusing on core administration tasks. This course also provides a foundation for students who plan to become full-time Linux system administrators by introducing key command-line concepts and enterprise-level tools.

This course is the first of a two-course series that helps a computer professional without Linux system administration knowledge to become a fully capable Linux administrator. These concepts are further developed in the follow-on course, Red Hat System Administration II (RH134).

This course is based on Red Hat® Enterprise Linux 10.0.

Following course completion, hands-on lab access will remain available for up to 45 days for any live course that includes a virtual environment.

## Who should attend

- System administrators, platform engineers, developers, and other IT professionals who have limited Red Hat Enterprise Linux experience but need to perform essential Linux administration tasks on a single server.
- This course is popular in RHA, and is targeted at the student who is planning to become a technical professional using Linux.

## This course is part of the following Certifications

Red Hat Certified System Administrator (RHCSA)  
Red Hat Certified Engineer (RHCE)

## Prerequisites

Basic familiarity with computer systems as a user. Previous experience as a Linux user or with system administration of other operating systems might be beneficial.

## Course Objectives

### Impact on the organization

The administration, configuration, and rapid deployment of Red Hat Enterprise Linux is the foundation for efficient IT infrastructure. This course will build the foundation for new Linux system administrators to integrate Red Hat Enterprise Linux with other existing systems, manage user and group administration, use available storage solutions, and efficiently and securely resolve configuration issues.

### Impact of this training

This course will help students learn the key tasks to become a full-time Linux system administrator. As a result of attending this course, students should be able to perform essential Linux system administration tasks, including installation, establishing network connectivity, managing physical storage, and basic security administration.

## Course Content

- Introduce Linux and the Red Hat Enterprise Linux ecosystem.
- Run commands and view shell environments.
- Manage, organize, and secure files.
- Manage users, groups, and user security policies.
- Control and monitor systemd services.
- Configure remote access by using the web console and SSH.
- Configure network interfaces and settings.
- Manage software by using DNF.

## Detailed Course Outline

### Introduction to Red Hat Enterprise Linux

Define and explain the following concepts: open source, Linux, Linux distributions, and Red Hat Enterprise Linux.

### Accessing the Command Line

Log in to a Linux system and run simple commands by using the shell.

### Getting Help from Local Documentation

Resolve problems by using information in local help systems and documentation.

### Registering Systems for Red Hat Support

Register a system by using your Red Hat account to get support services and software that Red Hat provides.

### Getting AI-assisted Help with RHEL Lightspeed

Get AI-driven guidance and suggestions to efficiently manage a RHEL server by using Red Hat Enterprise Linux Lightspeed.

### Navigating the File-system Hierarchy

Describe the organization of files in the Linux file-system hierarchy and specify files by name, by using relative paths or absolute paths.

### Managing Files from the Command Line

Copy, move, create, delete, and organize files from the command line.

### Editing Text Files

Create, view, and edit text files from the command line.

### Redirecting Shell Input and Output

Redirect the output of commands and input to commands, by using Bash.

### Managing Local Users and Groups

Obtain superuser access to a system; create, manage, and delete local users and groups; and administer local password policies.

### Controlling Access to Files

Set standard permissions on files and interpret the security effects of different permission settings.

### Installing and Updating Software with RPM

Download, install, update, and manage software packages from Red Hat and DNF package repositories.

### Installing and Updating Applications by Using Flatpak

Install, upgrade, and use desktop software from the Red Hat Ecosystem Catalog by using Flatpak.

### Accessing Removable Media

Access file systems on removable media devices by mounting them on a directory in the file-system hierarchy.

### Monitoring and Managing Linux Processes

Investigate, control, and terminate processes that run on a Red Hat Enterprise Linux system.

### Controlling Services and Daemons

Control and monitor the system services and daemons that systemd starts.

### Introduction to Networking

Describe basic TCP/IP networking concepts and investigate the current network configuration and functionality on a server.

### Managing Network Configuration

Configure network interfaces and settings on Red Hat Enterprise Linux servers.

### Configuring and Securing SSH

Protect SSH communication by managing host keys and by implementing key-based authentication for users.

### Comprehensive Review

Practice skills learned in Red Hat System Administration I.

# About Fast Lane

Fast Lane is a global, award-winning specialist in technology and business training as well as consulting services for digital transformation. As the only global partner of the three cloud hyperscalers- Microsoft, AWS and Google- and partner of 30 other leading IT vendors, Fast Lane offers qualification solutions and professional services that can be scaled as needed. More than 4,000 experienced Fast Lane professionals train and advise customers in organizations of all sizes in 90 countries worldwide in the areas of cloud, artificial intelligence, cyber security, software development, wireless and mobility, modern workplace, as well as management and leadership skills, IT and project management.

## Fast Lane Services

- ✓ High End Technology Training
- ✓ Business & Soft Skill Training
- ✓ Consulting Services
- ✓ Managed Training Services
- ✓ Digital Learning Solutions
- ✓ Content Development
- ✓ Remote Labs
- ✓ Talent Programs
- ✓ Event Management Services

## Training Methods

- ✓ Classroom Training
- ✓ Instructor-Led Online Training
- ✓ FLEX Classroom – Classroom & Online Hybrid
- ✓ Onsite & Customized Training
- ✓ E-Learning
- ✓ Blended & Hybrid Learning
- ✓ Mobile Learning

## Technologies & Solutions

- ✓ Digital Transformation
- ✓ Artificial Intelligence
- ✓ Cloud
- ✓ Networking
- ✓ Cyber Security
- ✓ Wireless & Mobility
- ✓ Modern Workplace
- ✓ Data Center

**Worldwide Presence**  
with high-end training centers  
around the globe

**Multiple Awards**  
from vendors such as AWS,  
Microsoft, Cisco, Google, NetApp,  
VMware

**Experienced SMEs**  
with over 19.000 combined  
certifications
